Spaniards, being taught of the
Indians, they did prize them
selves with those things, in the wondrouses which they re
ceived in their Warses, healing themselves therewith to
their great benefit.

Within these few yeares there hath been brought into
Spanye of it more to adornate Gardens with the faire
nesse thereof, and to give a pleasant sight, than that
it was thought to have the meritorious medicinal vertues
which it hath, but now we see it more for his vertues
than for his fairenesse. For truly they are such which doo

that the grounds where it is sowne, be well tilled, and
that it be a fruitful grounde and at all times it is sowne, in
the hot Countries. But in the colde Countries it must be
sowne in the moneth of Marche, so that it may defend it
self from the frost.

The proper name of it amongst the Indians is Picrot, The name
