A valuable adjunct to the dietary regimen is Desoxyn Hydrochloride—to dull the sensation of hunger, buoy the spirits, help make the patient a better match for temptation. Weight for weight, Desoxyn is more potent than other sympathomimetic amines so that smaller doses can produce the desired anorexia. With the recommended dosage there is seldom any side-effect or feeling of "drug stimulation." One 2.5-mg. or 5-mg. tablet before breakfast and another about an hour before lunch are usually sufficient. In addition, Desoxyn has a faster action, longer effect. Try it—in obesity and in other conditions indicating an effective central stimulant.

2.5 mg. per fluidrachm

Ampoules
20 mg. per cc.
for a sound mind and healthy body
plenty of citrus fruit

Diets restricted because of allergies, diabetes, ulcers, etc. are frequently
low in vitamin C—thus adding a nutritive deficiency to the existing
condition. In gastric and duodenal ulcers, a scurvy state is
particularly serious because it interferes with collagen formation and
capillary integrity. Florida orange juice alone—or with milk to
prevent a possible "burning" sensation—is not only a palatable
source of vitamin C, but a quick means for providing an energizing
"lift" produced by the easily assimilable fruit sugars. Fortunately Florida orange juice is virtually non-allergenic.

FLORIDA CITRUS COMMISSION - LAKELAND, FLORIDA

Citrus fruits—among the richest
known sources of vitamin C—also
contain vitamins A and B, readily
assimilable natural fruit sugars, and
other factors, such as iron, calcium,
citrate and citric acid.

BELIEVE IN YOURSELF!

Doctor, you probably have read a great deal of cigarette advertising with all sorts of claims.

So we suggest: make this simple test...

Take a PHILIP MORRIS—and any other cigarette. Then,

1. Light up either one. Take a puff—don’t inhale—and s-t-o-w-a-y let the smoke come through your nose.

2. Now do exactly the same thing with the other cigarette.

Then, Doctor, BELIEVE IN YOURSELF!

PHILIP MORRIS

An Unsurpassed Estrogen Therapy

Small dosage makes ESTINYL inimitable among orally effective estrogens. As little as two hundredths of a milligram daily relieves menopausal symptoms and produces a sense of well-being obtainable only with larger doses of other estrogens.

ESTINYL®
(ethinyl estradiol-Schering)

Available for treatment of menopause and other estrogen deficiency states, in tablets of 0.02, 0.05 and 0.5 mg.

When Lactation Fails

**LACTOGEN®**

When the supply of breast milk is inadequate or when lactation fails entirely, there is no better formula than Lactogen. Designed to resemble mother's milk, it consists of whole cow's milk modified with milk fat and milk sugar. It differs, however, in one important respect: the protein content of Lactogen in normal dilution is one-third greater than that of mother's milk—2.0% instead of 1.5%.

**A Complete Infant Formula In One Package**

Lactogen contains all the ingredients of a well-balanced infant formula. In addition, it is fortified with iron to compensate for the deficiency of this mineral in milk.

**Easily Prepared... Merely Add Water**

Lactogen is simple to use. The prescribed amount is stirred into warm, previously boiled water. Either a single feeding can be prepared, or the entire day's quantity can be made up and stored in the refrigerator until used.

Makers of Nestlé's Evaporated Milk

"No Finer Milk Can Be Produced"
"Nowhere in medicine are more dramatic therapeutic effects obtained than those which follow estrogen therapy in the girl who has failed to develop sexually. A daily dose of 2.5 to 3.75 mg. of ‘Premarin’ given in a cyclic fashion for several months may bring about striking adolescent changes in these individuals."

"Premarin"—a naturally occurring conjugated estrogen—long a choice of physicians treating the climacteric—has been earning further clinical acclaim as replacement therapy in hypogenitalism.

In the treatment of hypogenitalism, the aim of "Premarin" therapy is to develop the reproductive and accessory sex organs to a state compatible with normal function.

Four potencies of "Premarin" permit flexibility of dosage: 2.5 mg., 1.25 mg., 0.625 mg., and 0.3 mg. tablets; also in liquid form, 0.625 mg. in each 4 cc. (1 teaspoonful). "Premarin" contains estrone sulfate plus the sulfates of equilin, equilenin, β-estradiol and β-dihydroequilin. Other α- and β-estrogenic "diols" are also present in varying amounts as water-soluble conjugates.

In Soft-tissue Infections: "Terramycin was used in [101] soft-tissue infections and proved to be of great value... Where the terramycin was used intravenously with the proper diluent, no instance of chemical phlebitis occurred... Where surgical intervention was used in conjunction with terramycin, the decrease in morbidity was marked and noteworthy... That terramycin has a wide and useful area of great value in the treatment of soft-tissue infections is beyond question."

Terramycin is also indicated in a wide range of

Gram-positive Bacterial Infections
- Lobar pneumonia • Mixed bacterial pneumonias
- Bacteremia and septicemia
- Acute follicular tonsillitis
- Septic sore throat • Pharyngitis
- Acute and chronic otitis media
- Acute bronchitis • Laryngotracheitis
- Tracheobronchitis • Sinusitis
- Chronic bronchiectasis
- Pulmonary infections associated with pancreatic insufficiency
- Scarlet fever • Urinary tract infections
- Acute and subacute purulent conjunctivitis
- Acute catarhal conjunctivitis
- Chronic blepharoconjunctivitis
- not involving the meibomian gland
- Abscesses • Cellulitis
- Furunculosis • Impetigo
- Infections secondary to Acne vulgaris
- Erysipelas • Peritonitis

Gram-negative Bacterial Infections
- Gonorrhea • Brucellosis
- Bacteremia and septicemia
- Friedländer’s pneumonia
- Mixed bacterial pneumonias
- Pertussis • Diffuse bronchopneumonia
- Post-partum endometritis • Granuloma inguinale
- Dysentery • Urinary tract infections
- Respiratory tract infections
- Cellulitis • Peritonitis • Tularemia

Spirochetal Infections
- Syphilis • Yaws • Vincent’s infection

Rickettsial Infections
- Epidemic typhus • Marine typhus
- Scrub typhus • Rickettsialpox
- Q fever • Rocky Mountain spotted fever

Viral Infections
- Primary atypical pneumonia (virus pneumonia)
- Lymphogranuloma venereum • Trachoma

Protozoal Infections
- Amebiasis

Available as
- CAPSULES
- ELIXIR
- ORAL DROPS
- INTRAVENOUS
- OPHTHALMIC OINTMENT
- OPHTHALMIC SOLUTION

almost
da quarter
million
babies
annually
allergic to
cow's milk?

"Approximately one of every fifteen infants is allergic
to cow's milk to some degree...," according to Klein in
a recently published article.* These allergic reactions pro-
duce a multiplicity of strange, baffling, serious and apparently
unrelated clinical syndromes.
In Klein's series of 140 distressed babies allergic to milk, "most
babies were relieved of their symptoms almost immediately by
discontinuing cow's milk in their formula and substituting
Mull-Soy..." These symptoms include eczema, pylorospasm,
diarrhea and colic.
Mull-Soy supplies (in standard 1:1 dilution) essential protein,
fat, carbohydrate and minerals comparable to those of cow's and
goat's milk. The fat in Mull-Soy is soy oil, a good source
of unsaturated fatty acids.
Mull-Soy is a liquid, homogenized (vacuum-packed)
food—easy to take, easy to prescribe.
Available in drugstores in 15½ fl. oz. tins.
